

Quantiphi's Generative AI Platform to Amplify the Productivity of Knowledge Workers

Field Technician

Can you provide me with a repair checklist for hydraulic press with error ER20345?

baioniq is a powerful enterprise-ready generative AI platform designed to help enterprises quickly onboard generative AI capabilities and apply them to domain-specific tasks. This will drive quantifiable business outcomes and empower teams with exciting capabilities, essentially giving them superpowers

baioniq is a cross-industry platform that makes it easy to build generative AI applications across the Healthcare and Life Sciences, Insurance, Banking and Financial Services, Retail, and Manufacturing verticals to name a few to augment knowledge workers:

Enhance Knowledge Discovery

baioniq can analyze and categorize large volumes of unstructured data to automatically extract relevant information and create structured knowledge repositories. This enables employees to easily discover and access relevant knowledge resources

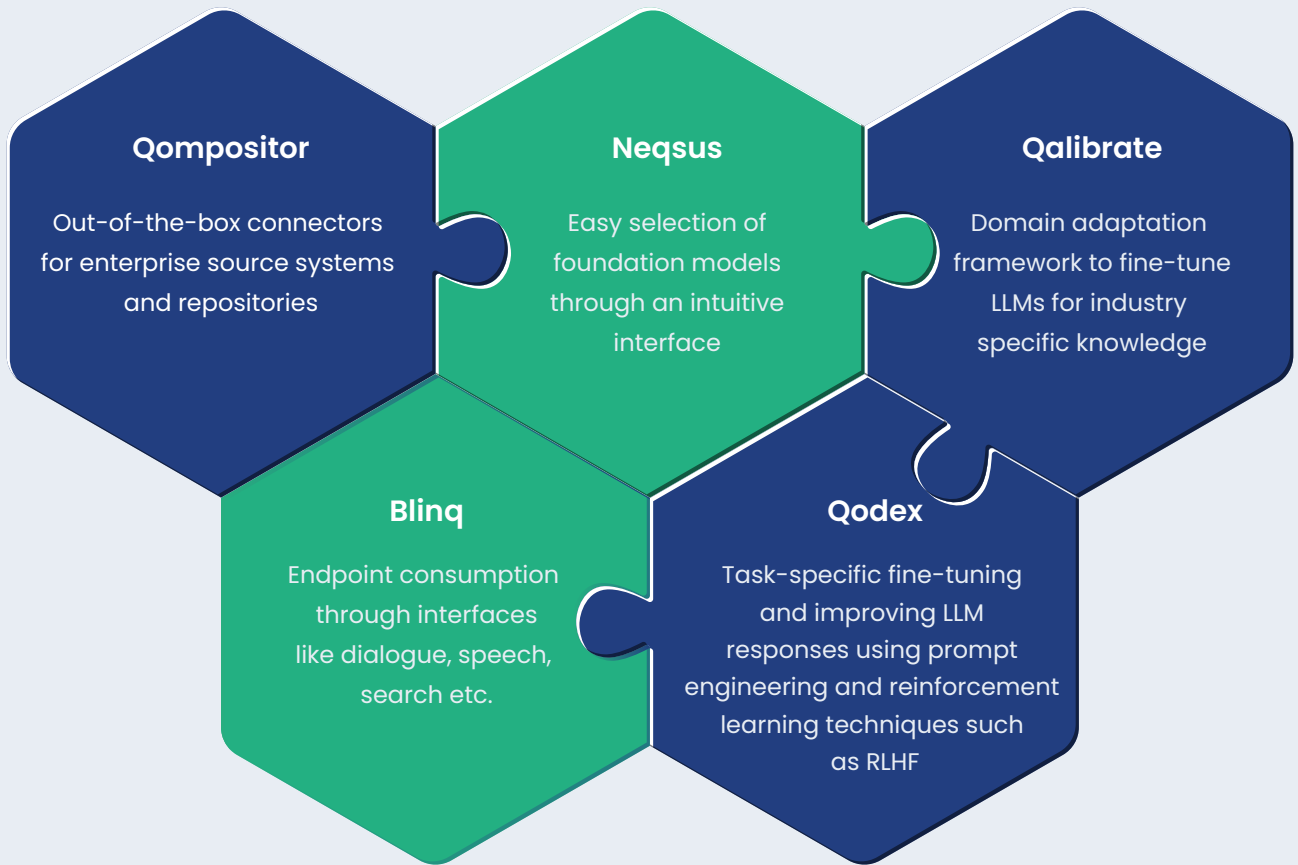

Enable Intelligent Search

baioniq can power advanced search functionalities that go beyond keyword-based searches. It can understand user queries, interpret context, and provide more accurate and contextually relevant results, even when the desired information is buried within complex documents or datasets.

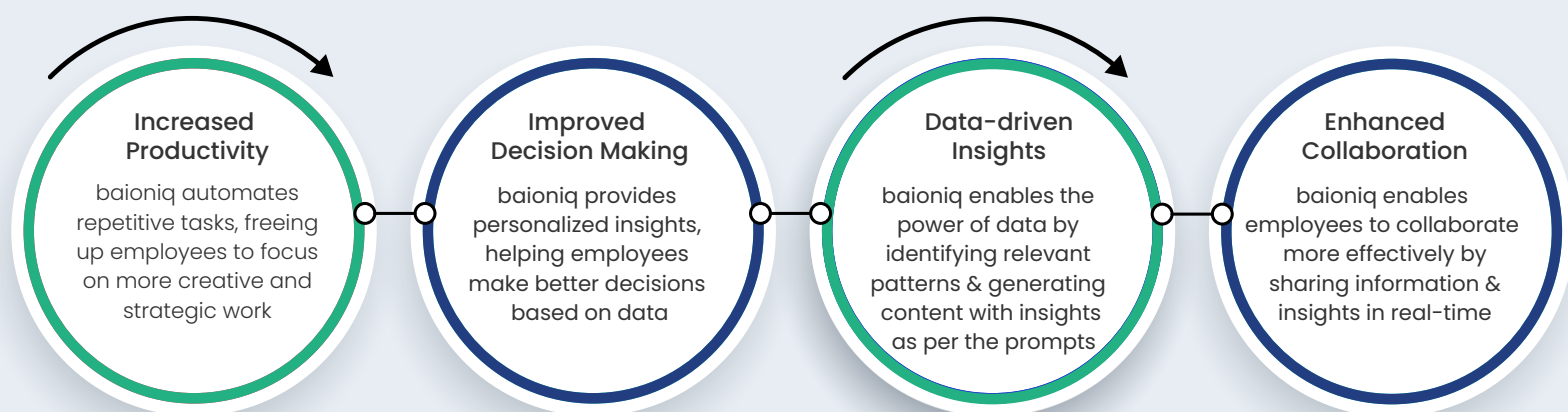

Support Decision-Making

baioniq can analyze, summarize and rewrite complex information, such as research reports or market data, to provide concise and easily digestible insights. By extracting key information and presenting it in a user-friendly manner, it can assist decision makers in making informed and data-driven choices.

baioniq provides a modular approach which makes it effortless for organizations to leverage generative AI for downstream applications

With baioniq, businesses can make Generative AI enterprise-ready and empower their knowledge workers to become more productive than ever before.
